

Year 1 Overview

Maths: The year 1 Maths curriculum covers topics such as addition, subtraction, shape, non-standard measurement, basic fractions and telling time. Place value is also introduced. Children are given the opportunity to solidify their knowledge through hands-on activities.

Our station time gives the children a chance to play while focusing on different areas in maths and phonics.

Phonics: Through our phonics program Letterland, the children learn initial sounds, medial sounds and blends which in turn helps the children learn to read and write.

Geography: Our geography bear Barnaby visits the children to learn about their home countries and culture.

The Year 1 curriculum also includes music, art and physical education.

We also leave time for play, imagination and being creative as this is an important part of 5-year old's development.
